Book Title: _____

Date Presenting: _____

Group Project: ¡Dime un Cuento!

For this group project, you and your group members will present a story to the class in Spanish. You will bring the book to class, work on determining what the story means in English, and then use a creative method to tell the story to the class. The more creative you are, the better. You can find a book at your local library, or purchase one if you so choose. The following is a rubric on my expectations for this group presentation.

Category	10-9	8-6	5-4	<4
El Libro	The book is appropriate and brought to class on time and on the days designated to work in class.	The book is appropriate, but not always in class when necessary.	The book is not appropriate or too difficult for the student to use for the purposes of this class.	The book is never in class for the student to work on it.
El Synopsis	The summary is accurate and shows good understanding of the target language as used in that book.	Summary is vague, but shows some understanding of the book and the target language.	Summary is vague and shows little to no understanding of what is going on in the book.	Summary never turned in.
El Synopsis: Formato	The Synopsis is typed, size 12 font, Times New Roman, double spaced.	The synopsis is typed, but does not meet all requirements.	The synopsis is neatly hand written.	The synopsis is hand written, but illegible.
La Creatividad	The method used by the group is creative and shows thought and planning.	While the method is creative, presentation was not well planned out.	The method used shows little creativity, and is poorly presented to the class.	There is no creativity and the group evidently did not plan out their presentation.
La Presentación	All members of the group participate in the presentation and it is between 5-7 minutes	All but one member of the group participates; presentation is over or under the allotted time.	All but two members of the group participate; presentation is over or under the allotted time.	Only one group member participates. Presentation is over or under the allotted time.

Total: _____ X2 = _____/100
